

TOURCUE ORGANIZER GUIDE

Building Your Route

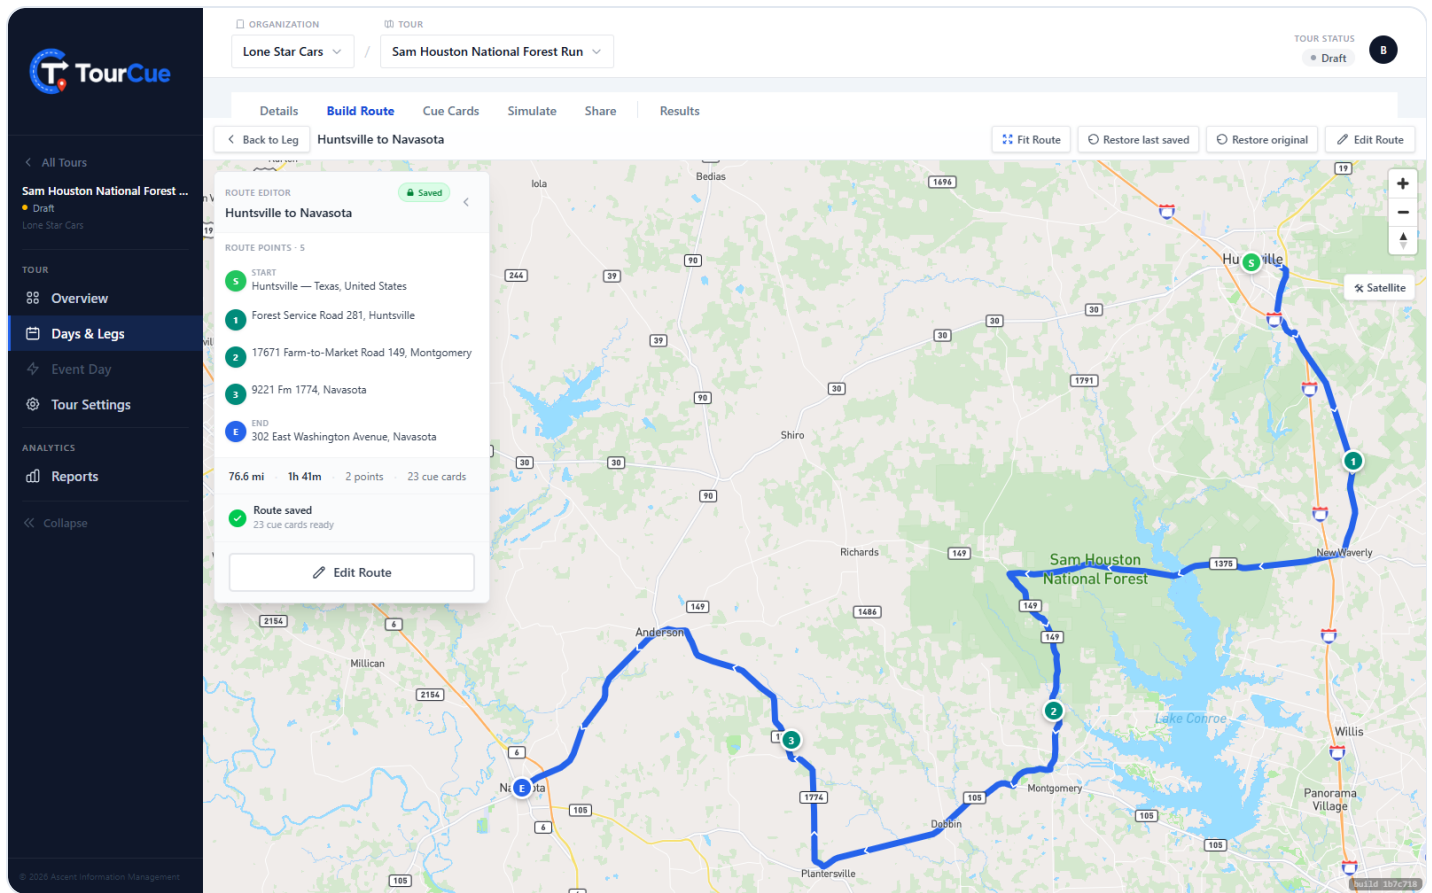

The Route Builder is the heart of TourCue. Instead of the fastest route, you hand your drivers the right one — the exact roads you want them on. It takes about a minute to learn.

► Watch the walkthrough video

► **Watch the video:** <https://www.tourcue.com/guides/04-route-builder>

1 Place your start and end

Click your start on the map — or search for an address — then your end. The moment both are set, TourCue draws a complete, drivable route along the roads between them.

2 Shape the path

Add the places that matter — a fuel stop, a regroup point — and the route reshapes to include them. Want a specific road? Grab the blue line anywhere and drag it onto the road you want; TourCue drops a silent shaping point there and recalculates.

3 Save — and your cue cards appear

When you save, TourCue generates the turn-by-turn cue cards from your route and stores them. Drivers navigate from exactly these — TourCue does not re-ask a map service at drive time — so what they see is what you approved.

7 cue cards have no street name — add landmarks so drivers recognize those turns

Clear landmarks Regenerate Save Changes

Tip: Click any instruction to edit it. Use the button to hide a cue card from drivers (it can be restored later). Add notes to give drivers extra context at any turn.

Start instructions

Optional driver-facing note shown before the first cue. Use this for parking lot exits, driver meeting instructions, or how to reach the first road point.

Driver's meeting at 9:00 AM — top off fuel in Huntsville before we roll.

1	Drive north on South Sam Houston Avenue/TX 75. onto South Sam Houston Avenue + Add landmark+ Add note for drivers	773 ft
2	Turn right onto 11th Street/US 190/TX 30. onto 11th Street Court House Watch for the pothole	1.6 mi
3	Turn right. + Add landmark+ Add note for drivers	2843 ft
4	Stay straight to take the TX 19 ramp. onto State Highway 19 + Add landmark+ Add note for drivers	1.7 mi
5	Take the exit on the left.	2317 ft

Tip: Searching a business by name drops the point on the building, which snaps to the nearest road — not always the right one. For a destination, click or drag the end pin onto the actual entrance road, on the correct side.

Troubleshooting tricky spots

- Arrives with a U-turn? Drop the End on the actual entrance road, correct side.
- Driveway or cul-de-sac causes an in-and-out? Drop the endpoint at the gate off the public road.
- A red U-turn badge on the Cue Cards tab? A point is on the wrong side of a divided road — nudge it over and save again.
